Whole School Picnic Word Problems

A school is planning a picnic for the last day of the summer term. Mrs. Ivanov, the school cook, is preparing all the food. She is sometimes a bit forgetful so has got muddled with some of her ingredients. Help her sort out the problems.

She bought 7 cucumbers but only needs 3. How many spare will she have?

7   3 = 4

She bought 9 apples but only needs 4. How many spare will she have?

9   4 = 5

She bought 8 bananas but only needs 5. How many spare will she have?

8   5 = 3

She bought 6 carrots but needs 2 more. How many does she need altogether?

6   2 = 8

She bought 4 packs of yogurts but needs 6 more packs. How many does she need altogether?

4   6 = 10

She bought 20 blocks of cheese but only needs 18. How many spare will she have?

20  18 = 2

She bought 15 lemons but needs 4 more. How many does she need altogether?

15   4 = 19

She bought 6 loaves of bread but needs 6 more. How many does she need altogether?

6   6 = 12

She bought 10 lettuces but needs 10 more. How many does she need altogether?

10   10 = 20

She bought 12 tomatoes but only needs 8. How many spare will she have?

12   8 = 4
